How to program IFTTT with Ultraloq?

Before we getting started, please make sure you paired Ultraloq products and bridge with your U-tec App, and already registered as an IFTTT user.

Here is the video instruction about how to setting up IFTTT with your Ultraloq.

<https://youtu.be/bxcJ3kWNLMY>

Step 1. Please turn on the IFTTT App and tap “Get more”.

Step 2. Tap the “Make your own Applets from scratch” button.

Step 3. Tap to select a trigger service.

Step 4. Search the keyword "Ultraoq", and tap "Ultraoq" trigger service.

Step 5. Please select the trigger. For example, we choose "Lock is unlocked".

Please don't choose "Any", it will cause the applet cannot be triggered.

← **Select trigger**

Ultraloq provides you with an ultimate keyless experience - Real Keyless for maximum flexibility and convenience. You are free to use fingerprint, code, key fob or smartphone to unlock. You can let your guests in by sharing an Ekey to them. With Ultralog Bridge, you can access and unlock Ultraloq remotely.

Select trigger

- Lock is unlocked
- Lock is locked
- Lock unlocked by specific person
- Lock is locked by specific person

Step 6. Please tap "Connect".

Step 7. Please choose the browser to open the link, then log in your U-tec Account on this website.

Step 8. Please tap "AUTHORIZE"

Step 8. Please tap AUTHORIZE .

Step 9. Please select the Ultraq device which has paired Ultraq bridge successfully in U-tec App , then tap "continue".

Step 9. Please tap the “+” icon in the red circle to add action service.

Step 10. Please set up the action service. For example, we choose “Notifications”.

Step 11. Please select the action you want, then tap connect.

Step 12. Please review the action message and tap “continue”.

Step 13. Finish.
